

CONFERENCE OF EUROPEAN STATISTICS STAKEHOLDERS

Methodologists, Producers and Users of European Statistics

Budapest, 20–21 October 2016

Organised by:

Eurostat, European Central Bank, European Statistical Advisory Committee, Federation of European National Statistical Societies,
Hungarian Central Statistical Office, Hungarian Statistical Association

Steering Committee

Walter RADERMACHER	Director General, Eurostat
Aurel SCHUBERT	Director General, Statistics Department of the European Central Bank
Ineke STOOP	Chair, European Statistical Advisory Committee
Gabriella VUKOVICH	President, Hungarian Central Statistical Office
Tamás RUDAS	Professor, Eötvös Loránd University, Director, Hungarian Academy of Sciences Centre for Social Sciences
Maurizio VICHI	President, Federation of European National Statistical Societies
Éva LACZKA	Secretary General, Hungarian Statistical Association

-  Are you a decision-maker in need of timelier statistics?
-  Are you a journalist trying to extract the right information from the wealth of official statistics at hand?
-  Then the 2016 Conference of European Statistics Stakeholders (**CESS 2016**) is the right forum for you to present the challenges that you face when using statistics, and the ways in which you would like statistics to improve.
-  Are you involved in the production of statistics at a statistical authority or institute?
-  Are you a researcher studying new statistical methods for data production and analysis at a university, statistical institute or research institution?
-  Are you interested in discussing new methods, tools and applications of dissemination and communication of different statistics in the digital era?
-  Then **CESS 2016** will give you an opportunity to present the best practices that you have put in place as well as new developments that you have achieved.

The event The **2016 Conference of European Statistics Stakeholders** aims to foster the dialogue between users, producers and developers of official statistics in Europe, to share best practices in the production of official statistics, to present innovative ways of visualising and communicating statistics, and to advance new methodological ideas for collecting and analysing data. We are confident that the topics of the Conference will be appealing to a broad range of participants who will also enjoy the attractions of Budapest and Hungary.

Venue

Hungarian Academy of Sciences
(1051 Budapest, Széchenyi István tér 9.)

Key dates

Submission of abstracts	31 May 2016
Notification to the authors of the abstracts	1 July 2016
Registration deadline	1 October 2016
CESS 2016	20–21 October 2016

Call for abstracts All statistics stakeholders (methodologists, producers, users) are warmly invited to contribute to the advances of European Statistics for the years to come by submitting a paper within one of the following strands:

- 1. Bringing in information from where we can get it**
Multi-source data collection: regulatory, methodological and quality issues
- 2. Learning more from what we already know**
New methods for data analysis: from design to model-based estimation
- 3. More rapid statistics and indicators on new phenomena**
New data sources for statistical production: experimental results
- 4. Getting the statistics out**
Innovation in statistical data dissemination: methods, tools, applications
- 5. Different users – different needs – variety of approaches**
Communication of statistical data in the digital era; enhance Statistical Culture by better communication towards Statistical Literacy
- 6. Small area statistics**
General and methodological issues concerning statistics and indicators of high granularity
- 7. Better statistics for a globalised world**
Challenges for making statistics on cross-border phenomena such as migration, tourism, trade and multinational enterprises
